

Mohit Thakur

Senior Frontend Engineer

Hyderabad, India • 8919772781 • mohitmilindthakur@gmail.com • [GitHub](#) • [Portfolio](#) • [LinkedIn](#)

Senior Frontend Engineer with 6.5+ years of experience building scalable, production-grade web applications using React, TypeScript, and modern JavaScript. Deep expertise in React ecosystem — Redux (Thunk & RTK), React Router, hooks, and component architecture — with hands-on experience delivering real-time financial platforms, healthcare SaaS, and global consumer web products. Proven track record of owning frontend end-to-end as a solo contributor, working directly with clients, and shipping robust, maintainable UI at scale.

CORE SKILLS

React	React 16–18, Redux (Thunk, RTK), React Router, React Query, Hooks, Context API
Languages	TypeScript, JavaScript (ES2020+), HTML5, CSS3
Styling	Tailwind CSS, SCSS/SASS, CSS Animations, Responsive & Mobile-first Design
Build Tools	Webpack, Vite, PWA, Web Workers, Code Splitting
Backend/APIs	Node.js, Express.js, REST APIs, WebSockets / Socket.IO, Broker APIs
Also familiar	Vue.js, Vuex, Pinia, Nuxt, Three.js, GSAP
Tooling	Git, Figma, AWS (deployment), Jira

WORK EXPERIENCE

Frontend Engineer | *Quantinsti*

Remote — Mumbai, India

Nov 2023 – Present

Sole frontend developer on Blueshift, an algorithmic trading platform used by one of India's largest brokers. Owned the entire frontend independently — from client requirement gathering through to production delivery.

- ▶ Maintained and shipped new features on Blueshift, an algorithmic trading platform handling real-time market data for live positions and trades
- ▶ Integrated broker REST APIs and WebSocket connections for live price feeds, position tracking, and trade execution updates
- ▶ Built a reusable component library (order entry forms, position managers, LTP tickers, symbol search) shared across multiple platforms
- ▶ Led a complete UI/UX revamp for a white-label version of Blueshift including dark/light theming and full mobile responsiveness
- ▶ Implemented PWA support and Web Workers for performance-critical background processing

Tech: TypeScript, Vue, Vue Router, Pinia, Socket.IO, Tailwind CSS, PWA, Web Workers, Node.js, Express.js

Experience Engineer L2 | *Publicis Sapient*

Hyderabad, India

Apr 2022 – Oct 2023

Part of the frontend team for a full rewrite of nescafe.com with new designs and architecture, including internationalisation support across multiple markets.

- ▶ Developed a wide range of responsive, cross-browser components: buttons, carousels, product cards, filters, and more, used across dozens of markets
- ▶ Built immersive animations and micro-interactions using CSS animations and GSAP for brand storytelling sequences
- ▶ Implemented a 3D interactive globe in Three.js for a flagship campaign feature
- ▶ Added RTL (right-to-left) language support across the majority of components for Middle East locales
- ▶ Configured Webpack for code splitting, tree shaking, and automatic LTR/RTL server setup

Tech: JavaScript, SCSS, jQuery, GSAP, Three.js, Webpack, Foundation UI

Frontend Engineer | Cloudfinch

Remote — Mumbai, India

Dec 2020 – Mar 2022

Sole frontend developer across three concurrent SaaS products and client projects spanning logistics, HSSE (Health, Safety, Security & Environment), and energy sectors.

- ▶ Built the complete React UI of Cargogen (logistics SaaS) from scratch, including theme system, component library, and API integration layer
- ▶ Developed Sentree AI (HSSE SaaS) UI end-to-end — configured design system, developed all modules, and handled full API integration
- ▶ Maintained and extended features on BPCL HSSE App, a mission-critical application for India's national energy company
- ▶ Created reusable utility libraries that standardised API integration patterns across all three products, reducing integration time significantly
- ▶ Set up and automated CI/CD deployment pipelines on AWS

Tech: React, Redux, React Router, Tailwind CSS, SCSS, Figma, AWS

Frontend Engineer | Aventior

Remote — Pune, India

May 2020 – Nov 2020

Part of the React frontend team on a Clinical Trials and Research platform for a US-based healthcare client.

- ▶ Developed a new flagship module from the ground up, including all UI components and business logic
- ▶ Led API integration for the module across multiple phases, with primary ownership in Phase 1
- ▶ Built responsive, accessible components following healthcare UX standards

Tech: React, Redux, React Router, React-Bootstrap, SCSS, Git

Frontend Engineer | Bon

Pune, India

Apr 2019 – Nov 2019

- ▶ Built interactive, spreadsheet-style data tables with colour-coded cells driven by business rules — used across multiple internal teams for daily operations
- ▶ Developed a click-to-call feature: clicking a cell opens a contact drawer and initiates a phone call to the respective lead
- ▶ Implemented inline ID verification — clicking an ID number displays the corresponding document image inline without a page reload

Tech: React, Redux, React Router, Material UI

EDUCATION

B.Tech, Automotive Engineering • Manipal University Jaipur • 2017
